

Double Action Gasoline Engine Pump

Model : HPG-700MX

Features :

- Used for wired remote control
- Large oil capacity, suitable for large capacity crimping tools and longtime operation without engine overheating
- High and low double-speed automatic switch, well fit for single and double action tools such as 60t, 100t, 200t and 300t
- Retract pressure protection system & overflow protection valve, safe and reliable
- Low noise, environment friendly
- Equipped with pressure gauge for pressure reading

Spesification :

| | | | |
|--------------------------------|-------------|-------------------------------|----------------------|
| ✓ Model | : HPG-700MX | ✓ Oil Delivery Pressure (Low) | : 7.5 L/min |
| ✓ Reservoir capacity | : 10 Litre | ✓ Engine Speed | : 3600 rpm |
| ✓ Rated Output Pressure | : 700 bar | ✓ Weight | : 53kg (include oil) |
| ✓ Oil Delivery Pressure (High) | : 1,2 L/min | ✓ Optional hose length | : 2, 4, 6, 10 metre |

Hydraulic Compression Head

Model : PCS-100

Features :

- Crimp overhead line ACSR, strain clamps for 110kV and underground cable sleeves for 220kV
- Double action hydraulic cylinder makes piston reset in short time
- Double action Hydraulic cylinder can avoid slow retraction by spring
- Quick coupler for easy disassembly
- Power by double action hydraulic pump

Spesification :

| | |
|---------------------------|----------------------------------|
| ✓ Model | : PCS-100 |
| ✓ Crimp Force | : 100 Ton |
| ✓ Rated Pressure | : 700 bar |
| ✓ Crimping capacity (Max) | : Cu / Al Ø 76 mm, Steel Ø 36 mm |
| ✓ Cylinder Type | : Double action |
| ✓ Weight | : 31 kg |
